WALL TAP

SPECIFICATIONS

Surge Protection Rating (L-N)	900 V
Joule Rating	300 J
Line Voltage	125 VAC
Maximum Line Current	15 A / 1875 W
Maximum Surge Voltage	6 kV
Nominal Discharge Current	3 kA
3-wire Grounding Outlets	6
USB Charging Ports	Four 5 VDC / 4.2 A Total Output

CONFORMS TO UL STD.498A AND 1449
CERTIFIED TO CSA STD C.22.2 NO.42 AND 269.3

1. Plug unit into a standard grounding 15A wall receptacle. Unit is not intended for use with 20A or GFCI wall receptacles.
2. Make sure electronic equipment is turned off before plugging it into the surge unit outlets.
3. Unit provides surge protection up to 300 Joules.
4. A glowing blue indicator light shows that surge protection is being provided. Check indicator light periodically (See NOTE).

NOTE:

• This device features an internal protection that will disconnect the surge-protective component at the end of its useful life, but will maintain power to the load - now unprotected.

• If the blue “protected” indicator light goes out, this unit will no longer provide surge protection as intended and should be replaced. This device is not a lightning arrestor, so it will not provide protection when lightning strikes nearby, power lines, the house, service entrance, or antennas.

5. 4.2 Amp total output allows you to charge 2 tablets, or one tablet and two smartphones at full capacity at the same time. Recharge your device at a maximum speed of 2.1 Amp when connected to a single port.

NOTE: USB charging ports may not charge all devices. Some devices require a proprietary power supply.

USB Indicator Feature:

LED color changes to indicate the charging status of your device charged through the USB ports.

Red - Charging

Green - Device(s) Charged

Light will change from Red to Green when the device is 95-100% charged and remain Green until fully charged.

This product is designed to limit damage to electronic devices from electrical surges of less than 300 Joules. The sensitivity of electronic devices to electrical surges varies, and this product may not protect electrical surges greater than 300 Joules, such as from lightning strikes. Please consult the manufacturer of devices plugged into this product and/or a licensed electrician to confirm recommended surge protection levels for all your devices prior to use.

FCC COMPLIANCE STATEMENT

This device complies with part 15 of the FCC rules and the Canadian ICES-003. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
